

Android Samsung Email Setup

These easy to follow guides provide step-by-step instructions on how to setup and troubleshoot your email program, with personalised screenshots providing visual examples to follow.

Your customised mail settings are as follows:

Email: you@your-domain.com

Incoming (POP) server: mail.your-domain.com

Outgoing (SMTP) server: smtp.your-domain.com

Account / User Name: you@your-domain.com

SMTP Authentication: On (same Username as POP)

SMTP Port: 587

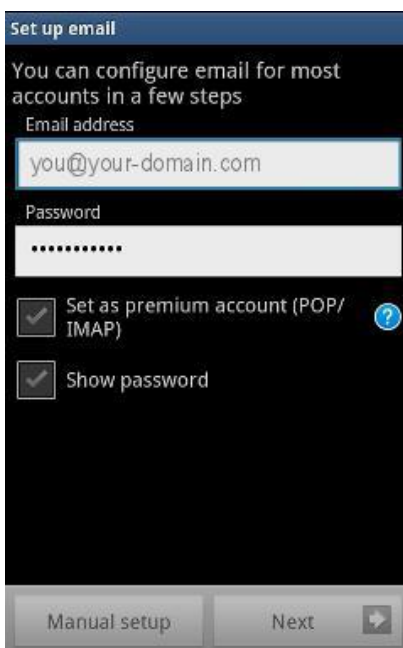

Launch your mail application

1. Start by selecting the mail icon from your applications screen.

Setup email

2. Enter the email address and email password as per the screen below and select "**Manual Setup**":

The screenshot shows the 'Set up email' screen. At the top, it says 'Set up email' and 'You can configure email for most accounts in a few steps'. Below this, there are two input fields: 'Email address' with the text 'you@your-domain.com' and 'Password' with a masked password '.....'. There are two checkboxes: 'Set as premium account (POP/IMAP)' which is checked, and 'Show password' which is also checked. At the bottom, there are two buttons: 'Manual setup' and 'Next' with a right arrow.

Incoming server settings

3. Ensure the User Name field is the full email address; enter all the relevant details as per the screen below and then select "**Next**":

The screenshot shows the 'Incoming server settings' screen. It contains the following fields and options:

- User name: you@your-domain.com
- Password: [Redacted]
- IMAP server: mail.your-domain.com
- Security type: None (dropdown menu)
- Port: 143
- IMAP path prefix: Optional
- Next button

Outgoing server settings

4. Enter all the relevant details as in the screen below and then select "**Next**":

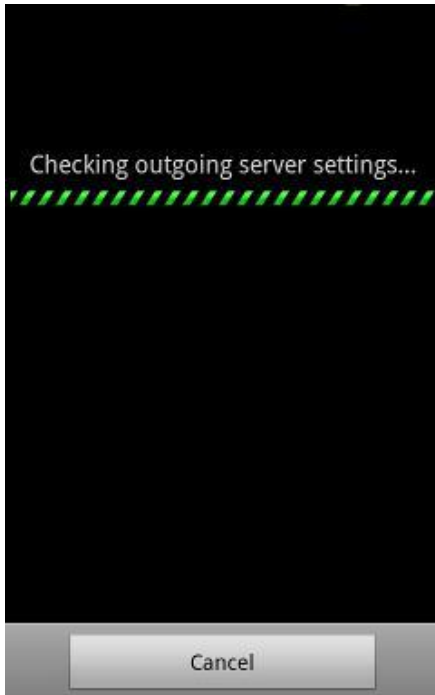

The screenshot shows the 'Outgoing server settings' screen. It contains the following fields and options:

- SMTP server: smtp.your-domain.com
- Security type: None (dropdown menu)
- Port: 587
- Require sign-in
- User name: you@your-domain.com
- Password: [Redacted]
- Next button

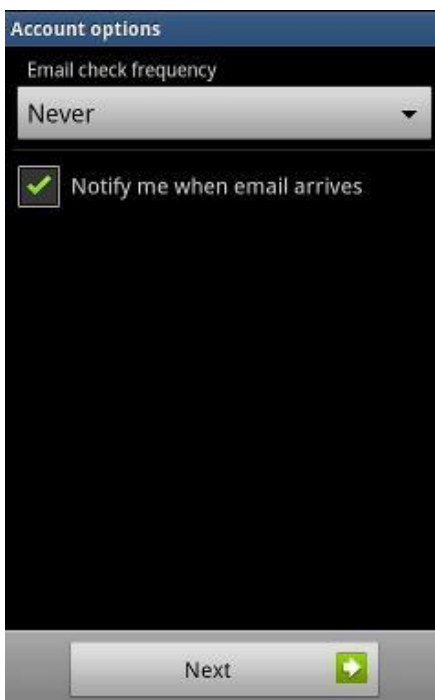

Checking outgoing server settings...

5. Wait while your settings are tested:

Account options

6. Adjust the additional Account Options as needed:

Additional setup

7. Specify an **optional** account name (for your reference only), and enter the name you wish to be displayed on outgoing mail, and then select "**Done**":

Set up email

Your account is set up, and email is on its way!

Give this account a name (Optional)

you@your-domain.com

Your name (Displayed on outgoing messages)

Name Surname

Done

Complete Setup

8. The account has been set up successfully and your messages will now be downloaded.
